PROFILE

As a Computer Science Engineering student with strong technical expertise and a collaborative mindset, I am eager to contribute to a dynamic organization. I aim to leverage my skills to deliver impactful solutions, support organizational growth, and advance my professional development.

TECHNICAL SKILLS

Programming Languages: Java | Python

Web Technologies: JavaScript | HTML | CSS

Frontend : React.js | React Native

Backend : Spring Boot | REST API

Databases: MySQL | AWS DynamoDB

Cloud-AWS : EC2 | S3 | Lambda | API Gateway | CloudFront | IAM | Lex | DynamoDB

DevOps & Tools: Git | GitHub Actions (CI/CD) | Docker | Pipelines

PROJECTS

► **University Management System (UMS) | Spring Boot, React.js, React Native, Java, MySQL**

Developed a full-stack web & mobile app to streamline academic operations. Implemented secure role-based access and features for course enrollment, attendance, grading, and exam management, enhancing efficiency and user experience.

► **CI/CD Pipeline for Portfolio | GitHub Actions, AWS S3**

Automated portfolio deployment with CI/CD using GitHub Actions. Hosted on AWS S3 for high availability and global accessibility, ensuring continuous integration and seamless updates.

► **AWS Serverless Student Management System | AWS Lambda, DynamoDB, Amazon Lex, Python**

Built a serverless application to manage student records with CRUD operations. Integrated an Amazon Lex chatbot for automated, natural language interactions, delivering a scalable, cost-efficient, zero-maintenance solution.

EDUCATION

B.E - Computer Science and Engineering | CGPA - 7.3

Karpagam Institute of Technology

2021 - 2025

HSC | 83%

Christ The King Matriculation Higher Secondary School , Kumbakonam

2020 - 2021

SSLC | 79%

Christ The King Matriculation Higher Secondary School , Kumbakonam

2018 - 2019

CERTIFICATES

• AWS Academy Cloud Foundations 

• Docker for Developers 

• Responsive Web Design 

• Proglint's Computer Vision National Hackathon 

AWARDS

Finalist - Proglint's National Hackathon

Became a finalist at Proglint's Computer Vision 2K23 National Hackathon, organized by Alliance College of Engineering and Design.
